DETAILED ACTION

Response to Amendment

1. The preliminary amendment filed on October 5, 2004 has been entered.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers

have been placed of record in the file.

Drawings

3. Figures 1 and 2 of the drawings filed on October 5, 2004 must be designated by a legend

such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office

action to avoid abandonment of the application. The replacement sheet(s) should be labeled

"Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion

of the drawing figures. If the changes are not accepted by the examiner, the applicants will be

notified and informed of any required corrective action in the next Office action. The objection

to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: (A) The references 4.

to claim 1 on page 1, lines 2 and 3, and page 4, lines 5 and 6 are improper and must be deleted.

(B) The phrase "of the size" on page 1, line 15 must apparently be changed to --on the size--. (C)

The word "pair" (page 1, line 22) must apparently be changed to --air--. (D) The expression

"0,3" (page 2, line 16; page 8, lines 21, 22, and page 9, line 23) must apparently be changed to --

0.3--. Appropriate correction is required.

Allowable Subject Matter

5. Claims 9-16 are allowed.

As allowable subject matter has been indicated, applicants' reply must either comply with 6.

all formal requirements or specifically traverse each requirement not complied with. See 37

CFR 1.111(b) and MPEP § 707.07(a).

7. The following is a statement of reasons for the indication of allowable subject matter:

The prior art fails to teach or fairly suggest a combined gas and electrostatic filter with first and

second electrodes substantially parallel to air flow, insulating material acting as a particle filter

located between the first and second electrodes, the material of one electrode being permeable to

air flow, having low electrical conductivity but filtering gases and shaped to form a bag.

Application/Control Number: 10/510,404

Art Unit: 1724

Conclusion

8. The prior art made of record is considered pertinent to applicants' disclosure. These

Page 4

references have been cited as art of interest to show other electrostatic filter systems.

9. This application is in condition for allowance except for the following formal matters:

(A) The drawings and specification must be corrected as explained respectively above in

paragraphs 3 and 4. (B) The phrase "such as activated carbon" (claim 9, line 13) is apparently

improper (note MPEP section 2173.05(d)) and must be changed to --comprising activated

carbon--. (C) The phrase "bag-like" (claim 14, line 4) is apparently improper (note MPEP

section 2173.05(b)F) and must be changed to --bag-shaped--.

Prosecution on the merits is closed in accordance with the practice under Ex parte

Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire TWO MONTHS

from the mailing date of this letter.

10. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Richard L. Chiesa whose telephone number is (571) 272-1154.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Duane S. Smith, can be reached at (571) 272-1166.
